

■ Variety

Shine Muscat

■ Introduction

These grapes are sweet with an elegant fragrance, and can be eaten whole with the skin. Numazawa Orchard has won numerous awards at competitive exhibitions. We deliver grapes that have been carefully chosen based on their color, shape, taste, and various other criteria.

■ Characteristics

These grapes are sweet with an elegant fragrance, and can be eaten whole with the skin.

Numazawa Orchard has won numerous awards at competitive exhibitions. We deliver grapes that have been carefully chosen based on their color, shape, taste, and various other criteria.

The Okitama area of Yamagata Prefecture is blessed with well-drained slopes, temperature extremes between night and day, little rain in summer and other ideal conditions, resulting in the production of Shine Muscat grapes with good color.

■ Packaging

Care taken to:
Prevent damage to the fruit

■ Recommended way of eating them

- Chilling the grapes in a refrigerator is one of the recommendable ways of eating them. This is popular among children.
- The grapes can be washed and eaten whole with the skin.
- Use them as topping on cakes, or eat them mixed with other fruit.

■ Best eaten

Early September to early October

■ Export season

Early September to late September

■ Exported to

Hong Kong

■ Export system and facilities

Plans to consider the development of packaging material, including cushioning, as a measure against berry shatter. As always, we will be paying direct visits to producers in bolstering efforts to supervise packaging.

■ Overseas PR activities

Shine Muscat is an extremely popular variety, and there is demand in Hong Kong for Shine Muscat grapes grown in Yamagata Prefecture due to the harvesting season coinciding with the Mid-Autumn Festival.

As with peaches, they are packed into baskets making suitable corporate gifts during the Mid-Autumn Festival season, and there is great demand for them.

MADE IN JAPAN

■ The characteristics and strengths of producers (the growing region)

Production amounts are decreasing for many varieties due to the difficulty of managing their cultivation, but Numazawa Orchard grows grapes centered on the rich and sweet Takao variety. The Okitama area of Yamagata Prefecture is blessed with well-drained slopes, temperature extremes between night and day, little rain in summer and other ideal conditions, resulting in the production of Shine Muscat grapes with good color.
